Spacetime - Wikipedia

Every set of coordinates, or particular space-time event, in such a universe is described as a “here-now” or a world point. In every inertial reference frame, all physical laws remain unchanged. Einstein’s general theory of relativity (1916) again makes use of a four-dimensional space-time, but incorporates gravitational effects. Gravity is no longer thought of as a force, as in the Newtonian system, but as a cause of a “warping” of space-time, an effect described explicitly by a ...

A Minkowski spacetime has a geometry in a sense that is analogous to the geometry of an ordinary Euclidean space. They are both "metrical" geometries. That means that they are geometries that deal with distances. Euclidean geometry is the familiar case.
