Introduction To Ethology The Biology

Ethology is the study of animal behaviors in a natural environment. This is opposed to behaviorism, where they study trained animals in lab environments. Behaviorism also doesn't focus on the evolutionary aspects, since they're in a lab environment. Ethologists will view the behavior and examine them from an evolutionary perspective, looking for clues towards adaptations.

Essentials of Animal Behaviour

Ecology is the study of the interactions of living organisms with their environment. Within the discipline of ecology, researchers work at four specific levels, sometimes discretely and sometimes with overlap. These levels are organism, population, community, and ecosystem. In ecology, ecosystems are composed of dynamically-interacting parts, which include organisms, the communities they comprise, and the non-living (abiotic) components of their environment.
