Theoretical and computational methods are used to define neuronal mechanisms underlying cognitive tasks in humans and animals, decipher the neuronal code, and relate natural systems with artificial neural networks.

Neuroscience at BGU - Theoretical and Computational ...

Computational neuroscience (also known as theoretical neuroscience or mathematical neuroscience) is a branch of neuroscience which employs mathematical models, theoretical analysis and abstractions of the brain to understand the principles that govern the development, structure, physiology and cognitive abilities of the nervous system. In theory, computational neuroscience would be a sub-field of theoretical neuroscience which employs computational simulations to validate and solve the mathematical problems.
