Health Informatics A Socio Technical Perspective

Improving health and healthcare institutions requires understanding of data and creation of interventions at the many levels at which health IT interact and affect the institution. These levels range from the external “world” in which the institution operates down to the specific technologies. Data scientists find that, when they aim at implementing their models in practice, it is the “socio” components that are both novel to them and mission critical to success.

The Social and Technical Context of Health Informatics ...

You see they focus on three kind of areas; health, information technology and then behavioral and social sciences.

This is why we call informatics a socio technical discipline because it's not just about the technology its about the people and the problems that the people have.

Nursing And Clinical Informatics Socio Technical Approaches

Sociotechnical perspectives assume that ‘organisational and human (socio) factors and information technology system factors (technical) are inter-related parts of one system, each shaping the other. In line with this, sociotechnical evaluations involve researching the way technical and social

dimensions change and shape each other over time.
