According to AIAG (2002), a general rule of thumb for measurement system acceptability is: Under 10 percent error is acceptable. >10 percent to 30 percent error suggests that the system is

acceptable depending on the importance of application, cost of measurement device, cost of repair, and other factors.

Measurement System Analysis (MSA) Definition

In 1992, the Automotive Industry Action Group (AIAG) began to formalize methods for a measurement system analysis in the automotive industry with its publication of a Measurement System Analysis Reference Manual (AIAG 1992). Since then it has become a de facto standard not only in the automotive industry but in the entire manufacturing industry.
