The cities that are most advanced in developing assessments and responses

to climate related risks have benefited from involving stakeholders at an early stage in the risk assessments, incorporating climate change considerations formally into planning frameworks and allocating responsibility for climate change issues to a designated group.

Climate change impacts and adaptation in cities | Academic ...

Climate change is a global phenomenon that largely impacts urban life. Rising global temperatures causes sea levels to rise, increases the number of extreme weather events such as floods, droughts and storms, and increases the spread of tropical diseases. All these have costly impacts on cities' basic services, infrastructure, housing, human livelihoods and health.

Cities and climate change | UNEP - UN Environment Programme

1. Introduction. Cities are central to global climate change mitigation and the implementation of low-carbon development strategies. Cities are home to more than half of the world population and are responsible for three quarters of global energy consumption and greenhouse gas (GHG) emissions (Gouldson et al., 2016). As centres of wealth and innovation, cities also have resources and tools that ...
