The Instant Composers Pool and Improvisation Beyond Jazz *Routledge*

The Instant Composers Pool and Improvisation Beyond Jazz contributes to the expansion and diversification of our understanding of the jazz tradition by describing the history and practice of one of the most important non-American jazz groups: The Instant Composers Pool, founded in Amsterdam in 1967. The Instant Composers Pool describes the meaning of "instant composition" from both a historical and ethnographic perspective. Historically, it details instant composition's emergence from the encounter between various overlapping transnational avant-gardes, including free jazz, serialism, experimental music, electronic music, and Fluxus. The author shows how the improvising musicians not only engaged with the cultural politics of ethnicity and race involved in the negotiation of the boundaries of jazz as a cultural practice, but transformed the meaning of music in society—particularly the nature of improvisation and performance. Ethnographically, The Instant Composers Pool encourages readers to reconsider the conceptual tools we use to describe music performance, improvisation, and creativity. It takes the practice of "instant composition" as an opportunity to reflect on music performance as a social practice, which is crucial not only for jazz studies, but for general music scholarship.

Throughout the text, the author engages directly with musicians and their varied practices--from canonized dogmas to innovative experimentalism--offering interviews both planned and spontaneous. same extensive treatment as do traditional areas of music teaching such as band, orchestra, choir, and general music. This book helps to establish a theoretical and practical foundation for how to teach students to use technology as the major means for developing their musicianship. Including discussions of lesson planning, lesson delivery, and assessment, readers will learn how to gain comfort in the music technology lab. *Theory and Practice of Technology-Based Music Instruction* also includes "profiles of practice" that dive into the experiences of real teachers in music technology classes, their struggles, their successes, and lessons we can learn from both. In this second edition, new profiles feature Teachers of Color who use technology extensively in their varied types of music teaching. This edition encourages readers to think about issues of inequity of social justice in music education technology and how teachers might begin to address those concerns. Also updated are sections about new standards that may guide music education technology practice, about distance and technology-enhanced learning during the global pandemic, and about ways to integrate technology in emerging contexts.

Composing for the Jazz Orchestra *University of Chicago Press*

This book can be used for analysis as well as for composition. On the one hand, it has the practical objective of introducing students to the process of composing in a systematic way, from the smallest to the largest forms; on the other hand, the author analyses in thorough detail and with numerous illustrations those particular sections in the works of the masters which relate to the compositional problem under discussion.

As a historian he writes without religious belief, but with a generous breadth of understanding; as a philosopher he writes of some of the great Jews of Europe: Spinoza, Heine, Marx, Trotsky, Luxemburg, and Freud. He explores the Jewish

imagination through the painter Chagall. He writes of the Jews under Stalin and of the “remnants of a race” after Hitler, as well as of the Zionist ideal, of the establishment of the state of Israel, of the Six-Day War, and of the perils ahead.
