12.1A: Introduction to Mendelian Inheritance - Biology ...

Genetics is the study of genes and tries to explain what they are and how they work. Genes are how living organisms inherit features or traits from their ancestors; for example, children usually look like their parents because they have inherited their parents' genes. Genetics tries to identify which traits are inherited, and explain how these traits are passed from generation to generation. Some traits are part of an organisms' physical appearance; such as a person's eye color, height or weight
