Equine Nutrition and Feeding has become the standard work on the subject, covering every aspect of the nutrition of breeding, growing and working horses, describing the basis upon which scientifically derived conclusions for nutrition and dietary requirements are reached.

Equine Nutrition and Feeding by David L. Frape

Equine nutrition is the feeding of horses, ponies, mules, donkeys, and other equines. Correct and balanced nutrition is a critical component of proper horse care. Horses are non-ruminant herbivores of a type known as a "hindgut fermenter." Horses have only one stomach, as do humans. However, unlike humans, they also need to digest plant fiber that comes from grass or hay. Ruminants like cattle are foregut fermenters, and digest fiber in plant matter by use of a multi-chambered stomach, whereas h
