enough...) Conversely, an experiment
with thousands of trials won't be terribly
convincing unless its p value is 1% or
less.

Reading 13: Experiment Analysis

An analysis should begin by explaining
what happened in the experiment.
Outline the process you used and the
data that you collected. After you have
described what happened in each
experiment, you can begin discussing

what can be learned from the data. Look at the experimental evidence collected and talk about why you think you got these results.
