Building Wealth with Silver *eBookIt.com*

We are all using dangerous, outdated, old economic strategies to protect and grow our money in the so-called 'new economy.' Most of us don't even know it. Every economy is, in some sense, 'new.' However, applying the rules from an 'older' economy to a 'newer' one during times of transition is a recipe for financial ruin. Economic transitions have been around for centuries . . . the difference is that now they are worldwide in scope and affect everything rather than local in nature with limited affects. While you sleep at night, while you go to work each day, something

insidious is actually stealing your financial future. It isn't anyone's fault really. There is a massive reallocation of wealth as we transition into the new economy. There are two sides to this story. Because of the changing rules of money, the greatest transfer of wealth in the nation and the world is now unfolding. Money is about to flow away from the financially uninformed and flow towards the financially well-informed in the years ahead. This is nothing new, really. Money has always worked this way. The good news is that average members of the public now have more ways than ever before to understand this process and to take appropriate action. I am sure you are aware of the rising price of gold that's been going on for almost 10 years now. Most recently, gold

started climbing with even greater speed. History repeats itself again and again. Whenever governments start to dilute their money investors transfer their money into gold. Gold has intrinsic value and will always prevail in any economy. What most non-investors and investors -- including yourself -- probably you don't realize is that although gold is a great way to preserve your wealth, it's silver that could actually make you rich! The price of gold has already risen dramatically, but silver is just beginning its climb. Nine Reasons Why Silver is a Unique Wealth Building Instrument - Silver, like gold, has intrinsic value- Silver has been in a commodity bull cycle since 2000- Silver is a safe hedge against currency inflation- Silver is a security choice during times of financial

crisis- Silver is rarer than gold- Silver is used in 90% of all electronics -- and its mostly non-renewable- Silver inventories are very low- Silver leasing -- the scam will be exposed soon- Silver investment markets are expanding thanks to the ChineseWhat You Will Learn From Building Wealth with SilverYou will discover why the Federal Reserve was created and why you and I have been kept in the dark about its true purpose. You will find out why the U.S. dollar is quietly being destroyed without fanfare and the reason this process is being publically denied and covered up. You will see why unemployment numbers, along with many other economic figures, are rigged, and how we're are being lied to about their true significance.The insights you get from the first few

chapters alone can change your life. Even if you were to study at Harvard for five years -- which would cost you, by the way, over \$95,000 -- you would not have the knowledge you need to get any closer to this kind of insider information.Learn why silver is the best investment opportunity right now.Get the facts on silver production and consumption, and all the details behind silver's projected five- to eight-fold increase over the next several months.

attempt to take stock of the various issues our cities and towns are facing in the area of urban transport, efforts made and being made both at the policy level as well as the field level to address the problems, the ever increasing complexities of challenges in the area of urban mobility and some of the laudable initiatives on the ground to handle the problems. This book would be a valuable addition to the limited literature available on the subject of urban transport in India. The topic has not attained much prominence even in the broader discussions on the transport sector issues in the country. The fact that we address our urban transport issues in a casual manner but there is need to take them up in a focused and purposeful manner and this can no

longer be delayed is probably the one loud message which is emerging out of this volume. The wealth of knowledge of the contributors, each one of them having huge experience behind them in this sector, makes the book a valuable addition to the literature and a helpful guide in policy discussions.

True Wealth of Nations

A Story of How Money Became Dishonest Money

What exactly is it that enables us to live as we do today? Is it that we work harder? Or, that we have more money? The simple truth is that we can live differently from how we lived a hundred years ago and a thousand years ago because of the accumulated sum of new ideas encapsulated in new technology. Money is in this sense only one small part of new technology, the myriad of ideas and inventions that support our way of living today. Why then are most solutions and even problems formulated in terms where "money" is essential? It is because it is the way we have been taught to think. Concepts used in economics, often grossly misinterpreted, have become our prison leading us into a very inhumane world. And we do not even see the prison bars that confines us

to certain solutions because we think this is just how it must be. We think it is established science. And because we do not even see the prison bars we become our own wardens. We have thus been beguiled by economists to think that money is wealth and this creates an inhumane world. Instead we should focus on ideas and our true needs as the source of creating true wealth. But if we are to get away from the present focus on money and speculation to get more money we must change how we think and for that we need new ideas, concepts and models. However, new ways of thinking about economic matters will not come from the economists or the greedy rich. They simply have too much to loose. Economists would loose a lot of prestige

or even their jobs and the rich would lose the easy ways they have invented to become rich by creating bubble money. We need new ways of viewing what is true wealth and how such is created. This way, and only this way, can we break free from the prison of economic thoughts that today dominate us. By applying his long experience in modeling the author shows alternate ways of viewing wealth, true wealth, based on modern research and sound principles of modeling. And that is thus what this book is all about. This book contains some mathematics. If you prefer a book without mathematical expressions, I recommend my book *A New Monetary System*.

Common Good Nation

It Is Time to Create a Parallel Nation Based on Agreement Rather Than Geography *Createspace Independent Publishing Platform*

This book is an i nvitation to join the Common Good Nation. It is time to create a parallel nation based on a more mature worldview. Also, where anyone on Earth can easily join or leave it at any time because it is defined by agreement rather than geography. It is also time to create a more mature form of democracy. The geographically defined nations provide us the possibility of creating in the private sector a nation

defined by agreement that can eventually become more important to people while they continue to be fully responsible as citizens of both. It is not 1776. It is 2017. Our human societies have matured. It is time to honor this maturation by providing the opportunity for people to join a nation that is based on our current level of human maturity. The Common Good Nation (CGN) you will herein be invited to join will be loved by the geographically nations. They will accurately view it as a free research and development program. Whatever it creates that works well can be copied or, if deemed best left in the private sector, supported with tax incentives. The CGN is based on people choosing their leaders from within groups of less than one hundred people where everyone

knows everyone well. This puts an end to millions of people going to polls to choose between two people to be the President of their country where almost none know both well. It also ends campaign fundraising, marketing tricks, fake news, and all the other troubles with choosing leaders that way. It is also very difficult to reach a majority decision on an issue where the worldviews of the citizenry are all over the map. This is the result of primarily defining a nation by the land it occupies. More quick and wise decisions can be made when all the people in the nation share a particular worldview. The CGN described in this book is based on a particular worldview. Only those who share it will join. It will also use a more mature democratic process briefly described above. There is

no taxation: except for a small annual fee to confirm a person as a citizen for the following year, all expenses are paid for with fees or donations. If you share its worldview and want to explore its use of a more mature form of democracy, we invite you to read this book and consider joining with us to create the CGN. You can do so by going to our website: www.commongoodnation.org.
