World Wide Web CGI (Common Gateway Interface) Programming in C. When the contents of a web

page are not static, but rather are generated on-the-fly as the page is fetched, a program runs to generate the contents. When that program requires input from the client who is actually fetching the page (input such as the selections made when filling out a form) that input is propagated to the program via the Common Gateway Interface, or CGI.

World Wide Web CGI (Common Gateway Interface) Programming in C

CGI is the part of the Web server that can communicate with other programs running on the server. With CGI, the Web server can call up a program, while passing user-specific data to the program (such as what host the user is connecting from, or input the user has supplied using HTML form syntax). The program then processes that data and the server passes the program's response back to the Web browser.

“CGI” stands for “Common Gateway Interface.” CGI is one method by which a web server can obtain data from (or send data to) databases, documents, and other programs, and present that data to viewers via the web. More simply, a CGI is a program intended to be run on the web. A CGI program can be written in any programming language, but Perl

CGI PROGRAMMING 101

In computing, Common Gateway Interface is an interface specification for web servers to execute programs like console applications running on a server that generates web pages dynamically. Such programs are known as CGI scripts or simply as CGIs. The specifics of how the script is executed by the server are determined by the server. In the common case, a CGI script executes at the time a request is made and generates HTML. In brief, an HTTP GET or POST request from the client may send HTML form

The often-mystified abbreviation CGI, for Common Gateway Interface, refers just to a convention on how the invocation and parameter passing takes place in detail. Invocation means different things in different cases. For a Perl script, the server would invoke a Perl interpreter and make it execute the script in an interpretive manner.

Getting Started with CGI Programming in C

CGI is one of the essential parts of HTTP (Hyper-Text Transfer Protocol). CGI is a set of standards that defines a standard way of passing information or web-user requests to an application program and getting data back to forward it to users. It is the exchange of information between the web server and a custom script.
