Integrated Production Control Systems By Bedworth D D ...

Because many kinds of systems have to be installed in a plant factory as described above, the system controlling all their instruments is one of the most important components. In the past, self-contained local control systems for individual instruments were common. In the GCN, an integrated control system has been established. Individual control circuits are constructed for each instrument with a programmable logic controller (PLC) in the local system, and in addition, a host PC controls ...

The Broadcast Pix remote panel can be used many ways to simplify live production control with fully integrated file-based macros and PixButtons. Use it as a traditional routing panel to assign, send or lock sources at the touch of a button, as a Macro panel to expand graphics control or as a remote panel to power your local system.

Integrated Production Solutions | Broadcast Pix, Inc. [US]

Computer-integrated manufacturing is the manufacturing approach of using computers to control entire production process. This integration allows individual processes to exchange information with each part. Manufacturing can be faster and less error-prone by the integration of computers. Typically CIM relies on closed-loop control processes based on real-time input from sensors. It is also known as flexible design and manufacturing.
