Surgery may be possible for both adults and children, and might be considered if: you have tried several AEDs and none of them have stopped or significantly reduced your seizures; and a cause for your epilepsy can be found in a specific area of your brain, and this is an area where surgery is ...

Epilepsy surgery | Epilepsy Society

Epilepsy surgery involves a neurosurgical procedure where an area of the brain involved in seizures is either resected, disconnected or stimulated. The goal is to eliminate seizures or significantly reduce seizure burden. Approximately 60% of all people with epilepsy have focal epilepsy syndromes. In 15% to 20% of these patients, the condition is not adequately controlled with anticonvulsive drugs. Such patients are potential candidates for surgical epilepsy treatment. First line therapy for epi
