AQUEOUS SOLUTIONS - [PPT Powerpoint] In aqueous solution, dissolved ions become hydrated; that is, a shell of water molecules surrounds them. Substances that dissolve in water can be categorized according to whether the resulting aqueous solutions conduct electricity. Strong electrolytes dissociate completely into ions to produce solutions that conduct electricity well.

4.1: General Properties of Aqueous Solutions - Chemistry ... The aqueous solution with lowest viscosity in Figure 5.2, ethyl al-cohol, has the highest viscosity of the fluids compared in Figure 5.8, followed by ethylene glycol. The salts, especially potassium formate, have low viscosity. However, hydrofluoroether has very low viscosity, which is its best property.
