Many have argued that its theoretical basis has been slow to develop and that, in fact, a substantial theory of Software Engineering is still lacking. Objective: We propose a design theory for Software Engineering as a contribution to the debate. Having done this, we extend it to a design theory for socio-technical systems.

Our design theory is based on a body of work accumulated in over a decade of research into a design-theoretic approach to problem solving in the context of software and systems engineering. The research cycle adopted has included both theory-then-(empirical-)research and (empirical-)research-then-theory strategies, starting from an initial theoretical proposition [14] .

Software Engineering Design: Theory and Practice

Software engineering is the study or practice of using computers and

computing technology to solve real-world problems. Computer scientists study the structure, interactions and theory of computers and their functions.

Software Engineering: Theory and Practice

Software engineering is a process of analyzing user requirements and then designing, building, and testing software application which will satisfy that requirements Important reasons for using software engineering are: 1) Large software, 2) Scalability 3) Adaptability 4) Cost and 5) Dynamic Nature. In late 1960s many software becomes over budget.

Software Engineering Design: Theory and Practice - Carlos ...

Software engineering theory and practice meld together computer science with artistry and design. It is a fine line to walk – software that is too “pretty” but doesn’t function isn’t effective, but software that isn’t written well can be difficult as well. Abstraction is a theory in both art and software engineering.

Software**Engineering Design: Theory and Practice****by Otero ...**

Software engineering is ultimately about psychology, how humans manage complexity. So software engineering principles are far more like education and management theories than physical principles. Some software engineering has solid math behind it: $O(n \log n)$ sorts are faster than $O(n^2)$ sorts, etc.
