Printing Environment. For good solder paste printing, it is required to maintain adequate environmental conditions as per given below and needs to record and monitor on a regular basis on the shop floor. Temperature: Maintain the operating temperature condition of the paste, typically between 70 and 76 F (21 – 25C). Operating outside of these settings may cause slumping or excessive drying out of the paste.

SMT Solder Paste Printing Process Description

Solder paste printed deposits are

essential to forming defect-free solder joints, the electrical and physical connections between electronic components and the PCB assembly. MPM printers excel in printing crisp, accurate, defect-free deposits of solder paste through metal foil stencils onto PCBs with consistent results every time, shift after shift, board after board, with precise, repeatable results.

The particle size should be controlled to about 25 ~ 45 μm in order to meet the requirements for fine-pitch QFP soldering, If the partical size desired is 25 to 30 μm , it should applied with less than 20 μm solder paste for an ultra fine-pitch IC. FluxFlux contains a thixotropic agent, which allows the solder paste to

have pseudoplastic flow characteristics.

An Analysis of SMT Solder Paste Printing Defects - Smart ...

An Analysis of SMT Solder Paste Printing Defects In SMT PCB production, solder paste printing is a critical step. Since the solder paste is used to directly form the soldering joint, the quality of solder paste printing affects the performance and reliability of the surface mount assembly.
