Use the template as a guide when creating your own plan, and customize it to suit your specific project.

Free Project Scope Templates | Smartsheet

Solution architecture is a structural design that addresses a set of functional and non-functional requirements. Generally speaking, solution architecture is immediately implemented as a program, project or change. This differs from enterprise architecture that may include long term roadmaps that take many years to implement. The following are illustrative examples of solution architecture.

6 Examples of Solution Architecture - Simplifiable

Solution design may take on both non-automated solutions (like adding more people to the business area or redesigning the manual process) or automated solutions (creating a mobile app

to allow people to order takeout food from a restaurant, for

example). One technique you can use to create the design area scope is a use case diagram.
