The cell is the basic living unit of the human body—indeed, of all organisms. The human body consists of trillions of cells, each capable of growth, metabolism, response to stimuli, and, with some exceptions, reproduction. Although there are some 200 different types of cells in the body, these can be grouped into four basic classes.

Bar Admissions Basic Overview. In order to obtain a license to practice law, almost all law school graduates must apply for bar admission through a state board of bar examiners. Most often this board is an agency of the highest state court in the jurisdiction, but occasionally the board is connected more closely to the state's bar association.

Basic Overview - American Bar Association

Function. The overall function of the immune system is to prevent or limit infection. An example of this principle is found in immune-compromised people, including those with genetic immune disorders, immune-debilitating infections like HIV, and even pregnant women, who are susceptible to a range of microbes that typically do not cause infection in healthy individuals.

Overview of the Immune System | NIH: National Institute of ...

This detection is performed by sensory organs on the tongue called taste buds. There are five basic tastes that these organs relay to the brain: sweet, bitter, salty, sour and umami. Receptors for each of our five basic tastes are located in distinct cells and these cells are found in all areas of the tongue. Using these tastes, the body can distinguish harmful substances, usually bitter, from nutritious ones.
