Turbocharging Internal Combustion Engines

A turbocharger, colloquially known as a turbo, is a turbine-driven, forced induction device that increases an internal combustion engine's efficiency and power output by forcing extra compressed air into the combustion chamber. This improvement over a naturally aspirated engine's power output is because the compressor can force more air—and proportionately more fuel—into the combustion ...

Engine Turbo/Super Charging - MIT OpenCourseWare

A supercharger is an air compressor that increases the pressure or density of air supplied to an internal combustion engine.This gives each intake cycle of the engine more oxygen, letting it burn more fuel and do more work, thus increasing the power output.. Power for the supercharger can be provided mechanically by means of a belt, gear, shaft, or chain connected to the engine's crankshaft.

Supercharger - Wikipedia

Internal combustion engines such as reciprocating internal combustion engines produce air pollution emissions, due to incomplete combustion of carbonaceous fuel. The main derivatives of the process are carbon dioxide CO 2, water and some soot—also called particulate matter (PM). The effects of inhaling particulate matter have been studied in humans and animals and include asthma, lung cancer, cardiovascular issues, and premature death.

Internal combustion engine - Wikipedia

The combustion air is drawn directly into the cylinder during the intake stroke. In turbocharged engines, the combustion air is already pre-compressed before being supplied to the engine. The engine aspirates the same volume of air, but due to the higher pressure, more air mass is supplied into the combustion chamber.

Principles of Turbocharging - BorgWarner Turbo Systems

One way to get a LOT more out of an engine is to turbocharge it. Put simply, a turbocharger, colloquially known as a turbo, uses fans to force extra air and fuel into the engine’s combustion chamber. The resulting improvement in engine efficiency and power output that a turbo achieves by doing this is remarkable. Turbochargers have been around for over a century.
