Teach Your Children Well *Harper Collins*

Psychologist Madeline Levine, author of the New York Times bestseller *The Price of Privilege*, brings together cutting-edge research and thirty years of clinical experience to explode once and for all the myth that good grades, high test scores, and college acceptances should define the parenting endgame. Parents, educators, and the media wring their hands about the plight of America's children and teens—soaring rates of emotional problems, limited coping skills, disengagement from learning and yet there

are ways to reverse these disheartening trends. *Teach Your Children Well* acknowledges that every parent wants successful children. However, until we are clearer about our core values and the parenting choices that are most likely to lead to authentic, and not superficial, success, we will continue to raise exhausted, externally driven, impaired children who believe they are only as good as their last performance. Real success is always an inside job, argues Levine, and is measured not by today's report card but by the people our children become fifteen or twenty years down the line. Refusing to be diverted by manufactured

controversies such as "tiger moms versus coddling moms," Levine confronts the real issues behind the way we push some of our kids to the breaking point while dismissing the talents and interests of many others. She shows us how to shift our focus from the excesses of hyperparenting and the unhealthy reliance on our children for status and meaning to a parenting style that concentrates on both enabling academic success as well as developing a sense of purpose, well-being, connection, and meaning in our children's lives. *Teach Your Children Well* is a call to action. And while it takes courage to make the changes we believe in, the time has come, says Levine,

to return our overwrought families to a healthier and saner version of themselves.

Teaching Your Children to Read Using the Book of Mormon

Turn Autism Around
Hay House, Inc
 Help remediate—and in some cases eliminate—autism and

other developmental delays in young children, even in as little as 15 minutes a day with this toolkit of behavioral practices that can be taught at home. Developmental delays and signs of autism usually show up before 18 months of age, yet children are often not diagnosed until they are 4 or 5 years old. In *Turn Autism Around*, Dr. Mary Barbera explains why parents can't afford to worry and wait in long lines for evaluations and treatment while not knowing how to help their children. She empowers parents, caregivers, and early intervention professionals to regain hope and take back control with simple strategies to dramatically improve

outcomes for their children. Dr. Barbera has created a new approach to teaching kids with autism and developmental delays that uses the science of Applied Behavior Analysis (ABA) married with a positive, child-friendly methodology that any parent can use—whether or not their child has delays—to learn to teach communication skills, socialization strategies, as well as tackle sleep, eating, potty training, and behavior challenges in a positive, effective, and lasting way. Turn Autism Around is the first book of its kind that calls attention to an important fact: parents can make a tremendous impact on their child's development through behavioral practices

taught at home, even in as little as 15 minutes a day. Her program shows these kids with autism and developmental delays can be remediated, and in some cases, delays can be caught up altogether, if parents intervene while the child is young. This book is for parents of young children aged one-to-five years who are passionate about helping their child as well as learning how they can change the trajectory of their child's and family's life.
