Dark Summit

The True Story of Everest's Most Controversial Season

Vintage Canada

In the tradition of Jon Krakauer's Into Thin Air, Nick Heil recounts the harrowing story of the deadly and controversial 2006

climbing season on Everest. In early May 2006, a young British climber named David Sharp lay dying near the top of Mount Everest while forty other climbers walked past him on their way to the summit. A week later, Lincoln Hall, a seasoned Australian climber, was left for dead near the same spot. Hall's death was reported around the world, but the next day he was found alive after spending the night on the upper mountain with no food and no shelter. If David Sharp's death was shocking, it was not singular: despite unusually good weather, ten others died attempting to reach the summit that year. In this meticulous inquiry into what went wrong, Nick Heil tells the full story of the deadliest year on Everest since the infamous season of 1996. He introduces Russell Brice, the outfitter who has done more than anyone to provide access to the summit via the mountain's north side—and who some believe was partially responsible for Sharp's death. As more climbers attempt the summit each year, Heil shows how increasingly risky expeditions and unscrupulous outfitters threaten to turn Everest into a deadly circus. Written by an experienced climber and outdoor writer, *Dark Summit* is both a riveting account of a notorious climbing season and a troubling investigation into whether the pursuit of the ultimate mountaineering prize has spiralled out of control.

No Way Down

Life and Death on K2 *Harper Collins*

"No Way Down is both a gripping read and a clear-eyed investigation of the hubris, politics, and bad luck that brought on one of the worst disasters in modern mountaineering history." — Michael Kudas, author of *High Crimes: The Fate of Everest in an Age of Greed* "Graham Bowley's *No Way Down* does a great job of putting you on the mountain. It is a refreshingly unadorned account of the true brutality of climbing K2, where heroes emerge and egos are stripped down, and the only thing achieving immortality is the cold ruthless mountain." — Norman Ollestad, author of *Crazy for the Storm* In the tradition of *Into Thin Air* and *Touching the Void*, *No Way Down* by New York Times reporter Graham Bowley is the harrowing account of the worst mountain climbing disaster on K2, second to Everest in height... but second to no peak in terms of danger. From tragic deaths to unbelievable stories of heroism and survival, *No Way Down* is an amazing feat of storytelling and adventure writing, and, in the words of explorer and author Sir Ranulph Fiennes, "the closest you can

come to being on the summit of K2 on that fateful day.”

Jamling Norgay interweaves the story of his own ascent during the infamous May 1996 Mount Everest disaster with little-known stories from his father's historic climb and the spiritual life of the Sherpas, revealing a fascinating and profound world that few -- even many who have made it to the top -- have ever seen.

Buried In The Sky *Penguin Random House South Africa*

Set both in the present and in the dust-laden reaches of Angola in 1976, *Buried in the Sky* is an album of stories about men and women and war. To the strains of the music of Bob Dylan and in long periods of boredom and inactivity, South Africa's soldiers tried to make sense of a war they could not see. Rick Andrew, himself a conscript at that time, allows his comrades to tell their stories. We get to know Manie Dippenaar, whose hunting trip threatened to turn into an international incident; Private Smith, the boy from the Bluff who had Love and Hate tattooed on his knuckles and chose a novel way to roast a chicken as his means of revenge on a bad tempered major; Morphine Sister, who handled a gun like a mamba; and Spek, the surfer-boy who dreamed only of catching the next big wave. Poignant, funny and dramatic, *Buried in the Sky* will strike a chord with anyone whose

life has been tarnished by war and especially those who found themselves on 'the border'.

Into Thin Air *Anchor*

#1 NATIONAL BESTSELLER • "A harrowing tale of the perils of high-altitude climbing, a story of bad luck and worse judgment and of heartbreaking heroism." —PEOPLE A bank of clouds was assembling on the not-so-distant horizon, but journalist-mountaineer Jon Krakauer, standing on the summit of Mt. Everest, saw nothing that "suggested that a murderous storm was bearing down." He was wrong. The storm, which claimed five lives and left countless more—including Krakauer's—in guilt-ridden disarray, would also provide the impetus for *Into Thin Air*, Krakauer's epic account of the May 1996 disaster. By writing *Into Thin Air*, Krakauer may have hoped to exorcise some of his own demons and lay to rest some of the painful questions that still surround the event. He takes great pains to provide a balanced picture of the people and events he witnessed and gives due

credit to the tireless and dedicated Sherpas. He also avoids blasting easy targets such as Sandy Pittman, the wealthy socialite who brought an espresso maker along on the expedition. Krakauer's highly personal inquiry into the catastrophe provides a great deal of insight into what went wrong. But for Krakauer himself, further interviews and investigations only lead him to the conclusion that his perceived failures were directly responsible for a fellow climber's death. Clearly, Krakauer remains haunted by the disaster, and although he relates a number of incidents in which he acted selflessly and even heroically, he seems unable to view those instances objectively. In the end, despite his evenhanded and even generous assessment of others' actions, he reserves a full measure of vitriol for himself. This updated trade paperback edition of *Into Thin Air* includes an extensive new postscript that sheds fascinating light on the acrimonious debate that flared between Krakauer and Everest guide Anatoli Boukreev in the wake of the tragedy. "I have no doubt that Boukreev's intentions were good on summit day," writes Krakauer in the postscript, dated August 1999. "What disturbs me, though, was Boukreev's refusal to acknowledge the possibility that he made even a single poor decision. Never did he indicate that perhaps it wasn't the best choice to climb without gas or go down ahead of his clients." As usual, Krakauer supports his points with dogged research and a good dose of humility. But rather than continue the heated discourse that has raged since *Into Thin Air*'s denouncement of guide Boukreev, Krakauer's tone is conciliatory; he points most of his criticism at G. Weston De Walt, who coauthored *The Climb*, Boukreev's version of events. And in a touching conclusion, Krakauer recounts his last

conversation with the late Boukreev, in which the two weathered climbers agreed to disagree about certain points. Krakauer had great hopes to patch things up with Boukreev, but the Russian later died in an avalanche on another Himalayan peak, Annapurna I. In 1999, Krakauer received an Academy Award in Literature from the American Academy of Arts and Letters--a prestigious prize intended "to honor writers of exceptional accomplishment." According to the Academy's citation, "Krakauer combines the tenacity and courage of the finest tradition of investigative journalism with the stylish subtlety and profound insight of the born writer. His account of an ascent of Mount Everest has led to a general reevaluation of climbing and of the commercialization of what was once a romantic, solitary sport; while his account of the life and death of Christopher McCandless, who died of starvation after challenging the Alaskan wilderness, delves even more deeply and disturbingly into the fascination of nature and the devastating effects of its lure on a young and curious mind."

The Book of Knowledge and Wonder

The Book of Knowledge and Wonder is a memoir about claiming a legacy of wonder from knowledge of a devastating event. In some ways it has the feel of a detective story in which Steven Harvey pieces together the life of his mother, Roberta Reinhardt Harvey, who committed suicide when he was eleven, out of the 406 letters she left behind. Before he read the letters his mother had become little more than her death to him, but while writing her story he discovered a woman who, despite her vulnerability to depression, had a large capacity for wonder and a love of familiar things, legacies that she passed on to him. The book tackles subjects of recent fascination in American culture: corporate life and sexism in the fifties, mental illness and its influence on families, and art and learning as a consolation for life's woes, but in the end it is the perennial theme of abiding love despite the odds that fuels the tale. As the memoir unfolds, his mother changes and grows, darkens and retreats as she gives up her chance at a career in nursing, struggles with her position as a housewife, harbors paranoid delusions of having contracted syphilis at childbirth, succumbs to a mysterious, psychic link with her melancholic father, and fights back against depression with counseling, medicine, art, and learning. Harvey charts the way, after his mother's death, that he blotted out her memory almost completely in his new family where his mother was rarely talked

about, a protective process of letting go that he did not resist and in a way welcomed, but the book grows out of a nagging longing that never went away, a sense of being haunted that caused the writer to seek out places alone-dribbling a basketball on a lonely court, going on long solitary bicycle rides, walking away from his family to the edge of a mountain overlook, and working daily at his writing desk-where he might feel her presence. In the end, the loss cannot be repaired. Her death, like a camera flash in the dark, blotted out all but a few lingering memories of her in his mind, but the triumph of the book is in the creative collaboration between the dead mother, speaking to her son in letters, and the writer piecing together the story from photographs, snatches of memory, and her words so that he can, for the first time, know her and miss her, not some made up idea of her. The letters do not bring her back-he knows the loss is irrevocable-but as he shaped them into art, the pain, that had been nothing more than a dull throb, changed in character, becoming more diffuse and ardent, like heartache.

The Curious Genesis of the World's First Ethnography *Thistle Publishing*

In 1806 a British privateer limped into the Tongan archipelago. This is the story of the fifteen year-old ship's clerk who, in four years, rose from being a naked and derided castaway to a member of the Tongan aristocracy. Eight years after he was rescued, William Mariner's account of his years in Tonga became a best-seller not because of its status as the world's first ethnography but due to the extraordinary adventure story he told. Surviving a massacre aboard the ship, Mariner was adopted by its perpetrator, King Finau, and groomed to be his lieutenant.

With the ship's cannons and muskets in the hands of the sixteen other crewmembers he had spared for the task, Finau plunged the islands into civil war. Mariner's graphic account of the impact of western arms upon a stone-age population is matched by his descriptions of the chaotic scenes that followed as Finau's army resorted to cannibalism and headhunting. But by placing himself at the centre of the action and airbrushing out the other crewmembers Mariner constructed a gripping but deeply deceptive narrative. From sources unavailable at the time of the publication of his account this book uncovers the extraordinary reasons for his deception. Praise for Nigel Randell's last book 'The White Headhunter': "His telling of Renton's story is brilliantly done....original and gripping. " - Sunday Times "It is an utterly compelling story." - Daily Mail "Fascinating and horrendous." - Publisher's Weekly "A fabulous ethnographic tale." - Kirkus Review

The Carbon Trap *CreateSpace*

Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in *The Carbon Trap*, the first book in *The Carbon Series*. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save

humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon taxes, draconian regulations, and... it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.

25 Thoughts About Your Destiny *Createspace Independent Publishing Platform*

This work is a compilation of 25 thoughts that could direct your

path towards peace, thoughtfulness and action. The thoughts in this space came to me as I witnessed truths of life unfolding for me through my own experiences. It is because of my desire to find tools for purpose in every event of my life that I find peace in both letting go and embracing that which is necessary. My hope is that: * You will find complete freedom and blessings in loss as it was intended for your destiny. * You will learn to look at your mistakes as natural lessons in your life rather than failures. * You will understand how your burdens are really the fuel for your motivation towards perfection. * You will realize that the thorns in your flesh can literally be the very tools you need to complete your assignment. * You will see all is not lost and what you thought was tragic is just another stepping stone towards your true fulfillment. * At the end of your spiritual literary journey with me, you will realize that you can be used AS IS for the fulfillment of your destiny.

The DUH! Book of Management and Supervision

Dispelling Common Leadership Myths : a Practical Guide for Leaders that Reminds Us of the Obvious

"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier

to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.
