Among them are other truck drivers, trucking customers, and official personnel having regular contact with truckers. See CB Terminology for help with any terms you're not familiar with. For the most part, the CB radio is (still) how you communicate in truck driving. There are other times, however, when communication is accomplished by truck drivers signaling with the truck's lights, flashers, and turn signals (See below for more information).

Trucker Communications

Currently, that starts and ends with engine data. "At this time, it is just engine codes, but there are plans to continue to grow that for other systems and other faults on the truck as well," Griffin says. "Customers want to know what's going on throughout the entire truck, not just the engine. I've heard that feedback with customers.

This code is concerned with the communications circuit between the engine control module and

other control modules throughout the vehicle. This communications circuit is most often referred to as Controller Area Network bus communications, or simply put, CAN bus. Without this CAN bus, control modules cannot exchange information, and your scan tool may not be able to communicate with the engine control module, depending on which circuit is affected.
