Coal utilisation in the cement and concrete industries ...

Preparation. To transform the coal ash into a slurry, coal is separated from non-combustible components and can be fractionated by particle size as well. Coal slurry can be transferred by pipeline or with specialized pumps such as a progressive cavity pump to pump the highly abrasive, corrosive and viscous coal slurry. More than 7 billion tons of coal are mined per year (2010), using ...

Coal slurry - Wikipedia

The two volumes of The coal handbook present a systematic and comprehensive review of coal production and utilization in industrial applications, from power plants to steel

and iron making, with emphasis on cleaner production. Volume 1 deals with the coal production supply chain and covers all of the important aspects of coal properties and characterization that drive utilization and influence both cost-in-use and increasingly significant environmental consequences.

The purpose of the website is to provide information regarding the Superfund program for communities, cleanup professionals, and concerned citizens.

Superfund | US EPA

The plan, proposed by the New York State Department of Environmental Conservation (DEC), would place stringent emissions standards on existing power plants that would effectively phase out coal plants in the state by 2020. Supporters of the plan believe it could create a model for other states to move away from coal to cleaner energy.
