Specimens are single, double, or triple injected—meaning 1, 2, or 3 of the above systems are injected, each with a distinct color. However, color and injected systems vary among specimens.

Guide to injection colors for preserved specimens

Description This large preserved grass frog specimen measures 4" to 4.5" in body length. It's double injected, meaning the arteries are injected with red latex and veins are injected with blue latex to easily trace the vascular system. Its size makes the internal organs and external structures simple to locate and easy to identify.
