Setting up the project on CircleCI Now that we have created a Heroku app and set up the configuration to facilitate deployment of our Nest.js application to Heroku by CircleCI, we need to configure our project on CircleCI. Log in to your CircleCI account with the linked GitHub account that contains the repository for our Nest.js application.

Continuous deployment of a Nest.js application to Heroku ...

Heroku is known for running apps in dynos – which are really just virtual computers that can be powered up or down based on how big your application is. Think of dynos as malleable building blocks for running your app.

What is Heroku? A Simple Explanation for Non-Techies

We define a diameter, chord and arc of a circle as follows: $\perp$ The distance across a circle through the centre is called the diameter. Thus, the diameter of a circle is twice as long as the radius. $\perp$ A chord of a circle is a line that connects two points on a circle. $\perp$ An arc is a part of a circle.

Circle Geometry - school-maths.com

Draw the circle using the compass. Put the compass point right where you want the center of the circle to be. Draw more circles overlapping the other one you already drew and continue drawing them

until you have a large amount. I drew the next circle with the center point three squares away from the first circle's center point.
