U Boot

U-boat is an anglicised version of the German word U-Boot ['u:bo:t] (listen), a shortening of Unterseeboot. While the German term refers to any submarine, the English one (in common with several other languages) refers specifically to military submarines operated by Germany, particularly in the First and Second World Wars.

The development of U-Boot is closely related to Linux: some parts of the source code originate in the Linux source tree, we have some header files in common, and special provision has been

made to support booting of Linux images. Some attention has been paid to make this software easily configurable and extendable.
