Constructs Concepts Variables Research Questions

Etymologically speaking, a variable is a quantity that can vary (e.g., from low to high, negative to positive, etc.), in contrast to constants that do not vary (i.e., remain constant). However, in scientific research, a variable is a measurable representation of an abstract construct. As abstract entities, constructs are not directly measurable, and hence, we look for proxy measures called variables.

2.2: Concepts, Constructs, and Variables - Social Sci ...

Concepts, constructs and variables. High quality dissertations clearly distinguish between concepts, constructs and variables. They do this so that the reader knows the difference between the broad concept/construct that you are interested in (e.g., gender) and the variables that you use to measure these concepts/constructs (e.g., whether an individual is male or female; or more broadly, male, female, bisexual, homosexual, transsexual, etc.).

Concepts, constructs and variables | Lærd Dissertation

Instead, we use variables to operationalize (i.e., measure) the constructs we are interested in. Constructs can be mistaken for variables because some constructs may only be represented by one variable, such that the construct name and the variable

name are the same (e.g., the construct and variable, sex). Therefore, constructs need to be translated from the abstract (i.e., mental ideas; mental abstractions) to the concrete (i.e., measureable/testable in the form of variables).

Definition of Variable Variables are those simplified portions of the complex phenomena that you intend to study. The word variable is derived from the root word "vary," meaning, changing in amount, volume, number, form, nature, or type. These variables should be measurable, i.e., they can be counted or subjected to a scale.

Examples of Variables in Research: 5 Strange Phenomena

Constructs are considered latent variable because they cannot be directly observable or measured. Typical constructs in marketing research include Brand Loyalty, Purchase Intent, and Customer Satisfaction. Constructs are the basis of working hypotheses. Brand loyalty is a construct that marketing researchers study often. Brand loyalty can be measured using a variety of measures:
