Practice Questions on Surface Area of Cube and Cuboid ...

Among all of the shapes, the surface area of a cube is the easiest one to find. You won't even need to use a surface area calculator for this. Since the formula for the surface area of a square is: $A = 6 \times (\text{side area})$ The area of the square equals the product of the length of all of its sides. Therefore, the formula for the surface area of a cube is:

Surface Area Calculator [Rectangle, Cone, Cube, Cylinder ...

The surface area of a cube can be found by finding the length of any of the cube's edges, then multiplying that length by

itself, then multiplying its product by six. This equation can be written as $A=6e^2$, where e stands for the length of any of the cube's edges.
