Functional Requirements Specification Template (MS Word) You can use this Functional Requirement template to define a function of a software system and how the system must behave when presented with specific inputs or conditions. These may include calculations, data manipulation and processing and other specific functionality.

Functional Requirements Specification Template (MS Word ...

A functional specification in systems

engineering and software development is a document that specifies the functions that a system or component must perform. The documentation typically describes what is needed by the system user as well as requested properties of inputs and outputs. A functional specification is the more technical response to a matching requirements document, e.g. the Product Requirements Document "PRD". Thus it picks up the results of the requirements analysis stage. On more
