Scientific Method And Metric System

In 1790, the French National Assembly commissioned the Academy of Science to design a simple decimal-based system of units; the system they devised is known as the metric system. In 1960, the metric system was officially named the *Système International d'Unités* (or SI for short) and is now used in nearly every country in the world except the United States. The metric system is almost always used in scientific measurement.

Lab Safety/Scientific Method/Metric system - Mr. Velasquez

First, the metric system is universal. All scientists agree on what constitutes the measures taken within this system. All scientists worldwide use this exact same system. This means that scientists can compare results they obtain with results obtained by any other scientist without conversions or errors. The lack of metric system use in the US is really an aberration; the rest of the world uses the metric system.
