### The Placebo Effect And Health

The placebo effect is a beneficial health outcome resulting from a person's anticipation that an intervention will help. How a health care provider interacts with a patient also may bring about a positive response that's independent of any specific treatment. Research supported by NCCIH has explored several aspects of the placebo effect.

#### Placebo Effect | NCCIH

"The placebo effect is more than positive thinking — believing a treatment or procedure will work. It's about creating a stronger connection between the brain and body and how they work together," says Professor Ted Kaptchuk of Harvard-affiliated Beth Israel Deaconess Medical Center, whose research focuses on the placebo effect.

### The power of the placebo effect - Harvard Health

A placebo doesn't have to be a pill. It can be any inert or 'dummy' treatment. The placebo effect is the positive effect on a person's health experienced after taking a placebo. It is triggered by the

person's belief in the benefit from the treatment and their expectation of feeling better, rather than the characteristics of the placebo.

### Placebo effect - Better Health Channel

Some of the negative symptoms the placebo effect can cause include headaches, nausea, or constipation. In most instances, the placebo effect only lasts for a short period. Many researchers believe the placebo effect is related to the human body's natural ability to relieve pain and other symptoms temporarily.

### Understanding The Placebo Effect - HealthPrep.com

The placebo effect is most pronounced and relevant when a treatment's success or failure depends largely on the subjective experiences of patients. That's often the case for conditions that are defined mainly by symptoms, such as depression, and problems like migraine headaches and back pain that are defined primarily by the pain they produce.

### Putting the placebo effect to work - Harvard Health

The perceived health benefits of multivitamins may be due to a placebo effect, a new study suggests. Researchers did not find any measurable health advantages between people who took multivitamins and those who didn't. People who took vitamins were more likely to report that they thought they were healthier, however, indicating there may be a small psychological boost linked to [...]
