ABSTRACT. This text presents a motivated introduction to the theory of measure and integration. Starting with an historical introduction to the notion of integral and a preview of the Riemann integral, the reader is motivated for the need to study the Lebesgue measure and Lebesgue integral. The abstract integration theory is developed via measure.

This is a graduate text introducing the fundamentals of measure theory and integration theory, which is the foundation of modern real analysis. The text focuses first on the concrete setting of Lebesgue measure and the Lebesgue integral (which in turn is motivated by the more classical concepts of Jordan measure and the Riemann integral), before moving on to abstract measure and integration theory, including the standard convergence theorems, Fubini's theorem, and the Carathéodory extension ...
