The requirements contain the behavior, attributes and properties of the future system. Therefore, the main task of the requirements is to ensure that they are understood by all stakeholders. The work with the requirements involves various processes, e.g. identification, analysis, verification and, finally, management.

Requirements. Why is it important?

Requirements gathering is an essential part of any project and project management. Understanding fully what a project will deliver is critical to its success. Requirements

gathering sounds like common sense, but surprisingly, it's an area that is given far too little attention.

In requirements engineering, requirements elicitation is the practice of researching and discovering the requirements of a system from users, customers, and other stakeholders. The practice is also sometimes referred to

as "requirement gathering". The term elicitation is used in books and research to raise the fact that good requirements cannot just be collected from

the customer, as would be indicated by the name requirements gathering. Requirements elicitation is non-trivial because you can ne
