1. Statistics and induction. Statistics is a mathematical and conceptual discipline that focuses on the relation between data and hypotheses. The data are recordings of observations or events in a scientific study, e.g., a set of measurements of individuals from a population. The data actually obtained are variously called the sample, the sample data, or simply the data, and all possible ...

Philosophy of Statistics (Stanford Encyclopedia of Philosophy)

Statistics is the discipline that concerns the collection, organization, analysis, interpretation and presentation of data. In applying statistics to a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model to be studied. Populations can be diverse groups of people or objects such as "all people living in a country" or "every ...
