For Carrier, you should look for the 7th and 8th digits, or maybe 8th and 9th digits, of the model number. It will be a

number divisible by 6 or 12, and represents the nominal BTU of the system in thousands. A ton of air conditioning equals 12,000 BTU, and 48 divided by 12 equals 4, so the data plate below indicates the system is 4 tons.

How many tons is my Carrier air conditioner or heat pump?
