Red Hat JBoss Application Server - BMC Documentation

The following sections describe how to configure a JBoss application server to work with eG agent. Configuring the

JBoss server to work with the eG Agent. To monitor the JBoss server, eG requires administrators to deploy two specialized components on the target server. These components are, the eG MBean Service component, and the eG Web

Component. In order to enable the eG agents to extract statistics from the JBoss server, the above-mentioned components need to be deployed on the JBoss server.
