Antibiotic Prescribing. Antibiotics can be prescribed by dental professionals to reduce risks of certain post-extraction complications. There is evidence that use of antibiotics before and/or after impacted wisdom tooth extraction reduces the risk of infections by 70%, and lowers incidence of dry socket by one third.

Dental extraction - Wikipedia

Despite the differences in pain perception among people, it is still measurable and has a great role in patients’ decision about completing their orthodontic treatment . In orthodontics, leveling and alignment stage involves inserting archwires in a specific sequence in order to get teeth aligned . Inserting orthodontic archwires - especially the initial archwire - is accompanied with generating orthodontic forces that lead to reactions in the periodontal tissues like edema and acute ischemia.

Low-level laser therapy effectiveness in reducing initial ...

Claims that extraction treatment is generally contraindicated because of airway considerations are too general to be useful. Extraction cases should be evaluated on a case-by-case basis, preferably with the aid of additional diagnostic evaluations, such as an obstructive sleep apnea screening.
