Rancho RS5000 shocks are available for stock and lifted applications, and for any on- or off-road use at an incredible value.

The core of this new and innovative shock from Rancho® is the unique and patented rebound valving system and an advanced compression phase of the shock absorber. This proprietary process developed by the ride engineers at Rancho will elevate the overall handling and

All 3 shock series are under a high pressure nitrogen gas charge. Neither company reveals exact PSI numbers on the nitrogen gas charge, but we expect Bilstein to be approaching 200psi, while Rancho is closer to 150. Higher PSI typically translates to firmer ride due to internal shock pressures, which affects valving and damping characteristics.

Rancho 9000 shocks  
have been one of my  
favorites so there was  
no question when I  
needed shocks for my  
2005 Dodge Ram. They  
look as nice as they  
perform. The  
adjustment wheel is a  
little chintzy but does  
work. I can never tell

what position they're in so I end up rotating fully counterclockwise then count clicks from there to set the stiffness.
