WHO Child Growth Standards: Methods and development

Overview. The Training Course on Child Growth Assessment is a tool for the application of the WHO Child Growth Standards. It is intended primarily for health care providers who measure and assess the growth of children or who supervise these activities. The course is designed for use over 3 1/2 days. It teaches how to measure weight, length and height, how to interpret growth indicators, investigate causes of growth problems and counsel caregivers.

WHO | Training Course on Child Growth Assessment

These are based on WHO Child Growth Standards, which describe the optimal growth for healthy, breastfed children. This chart should be used for preschool infants and toddlers requiring plotting of growth data in primary or secondary care up to age four. It is also suitable for moderately preterm infants (32-36 weeks gestation).

RCPCH-WHO baby growth charts for 0-4 years

The growth of most children less than four years of age should be plotted on the more detailed UK-WHO 0-4 year growth charts. However, children who have been plotted on the NICM chart up to age two years can transfer straight onto the 2-18 chart. Please contact growth.charts@rcpch.ac.uk for any further information.
