Pilot: Passive Device-Free Indoor Localization Using ...

Passive localization is a fundamental problem that usually accomplishes localization task using the radiation signals of the target without radiating electromagnetic wave signals outwards, which has been widely used in many fields such as radar , sonar , sensor network , and wireless communication . The passive localization method belongs to a two-step localization system.

Passive Radar Source Localization Based on Cuckoo Search ...

Based on the analyzing of the optimal distribution and the position error calibration of all the sensors, we formulate the localization scheme to estimate the position of the target source, which combines the time difference of arrival (TDOA) method and the frequency difference of arrival (FDOA) method. Then by employing the semidefinite programming approach, we accurately obtain the position and velocity of the signal source.
