Navigation - Mountain Survival

Mountain navigation – an introduction. Navigation in the Scottish mountains can be challenging. Our mountain weather is susceptible to change with little warning. A blue-sky day with good visibility can very quickly change to one of poor visibility, demanding good navigation techniques. It is also worth noting that there is not a culture of ‘way marking’ in the Scottish mountains as

in some other mountain areas, and just because a path is marked on the map does not guarantee that it ...

A mountain is a large landform that rises above the surrounding land in a limited area, usually in the form of a peak. A mountain is generally considered to be steeper than a hill. Mountains are formed through tectonic forces or volcanism. These forces can locally raise the surface of the Earth. Mountains erode slowly through the action of rivers, weather conditions, and glaciers.
