Aging may also bring
positive cognitive
changes. For example,
many studies have
shown that older adults
have more extensive
vocabularies and
greater knowledge of
the depth of meaning

of words than younger adults. Older adults may also have learned from a lifetime of accumulated knowledge and experiences.

How the Aging Brain Affects Thinking | National Institute ...

The Committee on Future Directions for Cognitive Research on Aging was formed to identify highly promising opportunities in behavioral science, cognitive science, and neuroscience and at the conjunctions of these fields. In 1999, the National Institute on Aging (NIA) asked the National Research Council to identify areas of opportunity in which additional research support would substantially improve understanding of

cognitive functioning in aging.
