Using Restorative Supervision To Improve Clinical Practice

In other words, supervision can be a creative venture where two or more people stretch their minds and create new ways of thinking and feeling about a client. Using methods of free association can help supervisees connect spontaneously to thoughts, feelings, sensations and images. This evokes new ideas for both therapists and supervisors alike.

Building more effective supervision

One key aim of safeguarding restorative supervision is to mitigate the risk that safeguarding supervision becomes solely a

management tool focused on task completion rather than a balanced process focused on supporting and enabling practitioners to use the critical thinking skills that are needed for safe practice.

confidently with emotion and challenge in safeguarding

Bromberg (1982) defines supervision as a relationship between two people, one of who has the purpose of using it to improve his work with someone in his or her life and the other who has the purpose of helping him or her to do this (ibid, cited in, Inskip & Proctor, 1995). Hess (1980) describes supervision to be a quintessential
