Transition Scenarios China And The United States In The ...

Strong growth of renewable power is the key driver of China's energy transition. 1. Despite slowing demand growth, China remains the world's largest primary energy consumer, accounting for over 20% of global consumption in 2050 in all three scenarios 2. Primary energy consumption peaks in all the three scenarios around the first half of the 2030s

Insights from the Rapid, Net Zero and Business-as-usual ...

Transition scenarios are descriptions of future states which combine a future image with an account of the changes that would need to occur to reach that future. These two elements are often created in a two-step process where the future image is created first (envisioning) followed by an exploration of the alternative pathways available to reach the future goal (backcasting).

Transition scenario - Wikipedia

Like all scenario-building researches, the two authors reach no absolute conclusion about an explicit 'most likely' US-China transition scenario. Based on existing research and their own observations, the authors build four main scenarios, giving a thorough discussion on each of these scenarios in subsequent chapters.
