Celestial cartography, uranography, astrography or star cartography is the fringe of astronomy and branch of cartography concerned with mapping stars, galaxies, and other astronomical objects on the celestial sphere. Measuring the position and light of charted objects requires a variety of instruments and techniques. These

techniques have developed from angle measurements with quadrants and the unaided eye, through sextants combined with lenses for light magnification, up to current methods whic

Celestial Maps - Customworks

The "Cosmos in Miniature: The Remarkable Star Map of Simeon De Witt" exhibition showcased the astronomical accomplishments of De Witt, a surveyor to George Washington and the Continental Army. The exhibition focused on De Witt's "astrolabe" of 1780, a small, circular map of the stars that were visible from his New Jersey post.
