Digitizer Studio is an advanced yet easy-to-use tool used to configure and control selected data acquisition products. The software can operate as a stand-alone measurement tool but also greatly simplifies evaluation and helps speed up system-level integration in embedded applications and for original equipment manufacturing (OEM) customers.

Digitizer Configuration And Acquisition Software

Digitizer Studio supports a range of functions that help with test and measurement tasks and performance evaluation: Common performance parameters such as spurious-free dynamic range (SFDR), signal-to-noise ratio (SNR), and total harmonic distortion (THD) can easily be measured in Digitizer Studio. This helps determine system-level performance without custom-developed evaluation software.
