Economic integration, process in which two or more states in a broadly defined geographic area reduce a range of trade barriers to advance or protect a set of economic goals. The level of integration involved in an economic regionalist project can vary enormously from loose association to a sophisticated, deeply integrated, transnationalized economic space. It is in its political dimension that economic integration differs from the broader idea of regionalism in general.

Economic integration. There are several stages in the process of economic integration, from a very loose association of countries in a preferential trade area, to complete economic integration, where the economies of member countries are completely integrated. A regional trading bloc is a group of countries within a geographical region that protect themselves from imports from non-members in other geographical regions, and who look to trade more freely with each other.

Geographical location of industry is affected by trade policy. For example, when a country is closed to trade, metropolitan areas would be an attractive location for industries, since that is where most of their customers, as well as their input suppliers, are located. However, once a country opens up to trade, the optimum location may change.
