A decant not only allows the wine to open up aromatically and texturally, but it also can allow a white wine to increase in temperature, which further allows its aromatics to shine. That said, you can also decant a white wine near an ice bucket, and control its temperature by placing it on the table and back on ice as you see fit, monitoring it as you enjoy.

DW: I prefer to use the term orange wine rather than skin contact wines because making red wine and some roses involves skin contact as well. Orange wine is made from white grapes that have been crushed and the juice, skins and seeds are all kept together, instead of separating the juice from the skins when making white wine.
