earth :: a global map of wind, weather, and ocean conditions

Broadly put, climate is the distribution and variation of weather patterns in an area over long periods of time as influenced by temperature, precipitation, and evaporation (Figure 3.6). Climate changes control almost all attributes of peat-forming ecosystems such as energy flux, plant dynamics, and soil and nutrient cycling (Bridgman et al., 1999). Climatic variables such as temperature and precipitation are the most important factors determining distribution, biodiversity, and growth of ...

Weather Pattern - an overview | ScienceDirect Topics

Scientists are studying how different factors impact the climate. Scientists also observe local weather for patterns that can be predicted on reliable timescales. The majority of climate scientists agree that one of the biggest threats to our Earth is the rapid, global climate change taking place as a result of human influence.

The study of energy interactions within the atmosphere leads to

the identification of systems that can be mapped as field A series of composite maps showing these atmospheric variables provides a picture of past and present conditions. Such a composite map is called a map. Weather forecasting is based on a series of synoptic maps.

Weather Pattern Lab - Weebly

Climatology or climate science is the scientific study of climate, scientifically defined as weather conditions averaged over a period of time. This modern field of study is regarded as a branch of the atmospheric sciences and a subfield of physical geography, which is one of the Earth sciences. Climatology now includes aspects of oceanography and biogeochemistry. The main methods employed by climatologists are the analysis of observations and modelling the physical laws that determine the climate.

Climatology - Wikipedia

Meteorologists and atmospheric scientists partake in weather prediction and issue warnings for severe weather. They understand atmospheric chemistry and physics and how they relate to weather and climate patterns. In addition, folks in meteorologist careers analyze how weather influences and affect human activity. Meteorologists are often grouped with climatologists and atmospheric scientists.
